### THE RAILWAYS.

Boyle. Formerly Vice President of the St. Louis Air Line, Makes a Statement Concerning That Road-Other Items.

Local freight business on the Monon is very heavy.

returned to his home in Terre Haute. The Vandalia people, it is said, will build several new station houses between this city and Terre Haute in the spring.

Pressdent McKeen, of the Vandalia, has

Conductors still protest against the train agent system which is gradually coming into use on some of the Indianapolis roads, Two or three thousand tons of the steel rails which the Wabash folks will receive during the coming spring will be laid on the

L. P. and C. division The supply of ice at Lake Maxinkuckee is not yet exhausted, but is said to be about twelve inches thick. An average of about twenty car loads have been shipped over the Logansport division of the Vandalia daily. Shipments are made to various points. A large amount is sent to Louisville, Evansville, Terre Hante and this city. The Logansport has in all probability secured more of this class of traffic than any other road in the State.

The E. and T. H. people say that certain parties in Vincennes are engaged in a contemptible practice to injure the road. Time and time again they have sent out dispatches of wrecks on this line when there was not a word of truth in any of them. If this is not stopped immediately they say the sender of the bogus dispatches will find himself in serious trouble, as the railroad company will not content itself hereaf er with a denial of all such reports, but will take steps to bring the offender to justice.

The lows Commissioners, in their report, direct attention to the fact that while the State regulates the management of the roads its citizens form but a small proportion of the stockholders. The total number of holders of railroad stock in laws is 25 900, holding stock amounting to \$390,586 766.44. citizens and residents of lows. The value of the holding of the Iowa citizens and residents is \$8 620,341.41; 25,160 stockholders live out of the State, and \$381,-966, 125 in value are held out of the State.

THE LOUISVILLE AIR LINE. The Louisville Courier-Journal gives the following statement as coming from St. John Boyle, formerly Vice President of the St. Louis Air Line: "There is much, however, to be done," said he, "before a reorganization can be effective. The equipment, rolling stock and sidings would have to be placed in a better condition. There is no disposition among the Eastern bondholders to wreck the property or to shut any interest out, but there is a desire to secure harmonious action and protect the interests of all concerned. From the intimations thrown out by Judge Gresham, a long receivership will not be permitted, nor will the Receiver be allowed to issue certificates, except to meet pressing demands. In all probability the reorganization will have to be made within the next twelve months, and in the meantime the motive power of the road and transportation facilities will have to be attended to. The present car trust contracts may have to either be surrendered or compromised, and more favorable contracts made in order that the equipment may be made perfect. The present constracts cover liabilities for equipment to the amount of \$700,000, the principal and interest of which is being paid mentally, but in view of the reduction in the price of equipment that matter can be placed in a much better condition. Locomotives that cost under the car trust contract \$10,000 can now be obtained for \$5 500. and if a comparison can not be made the present equipment can be surrendered and a new trust created on much better terms. so that by the time a sale is ordered the road may be placed on a sounder basis and a re-organization effected, under which the prop-erly ran be bought by the committee."

The famous polo club from Chicago will meet the Meridian team to-night. An exel'ent game may be expected.

The "collar and hat party" at the Wigwam Rink last evening was a very amusing as well as successful affair. The audience was large, the collars were large, the hats were large, and the enjoyment was large. The management had offered prizes of a pair f skates each to the wearers of the largest hat-lady and gentleman-and the same for the largest collars.
